Html, Css, JavaScript, React.js, Python, MySql, Node.js, MongoDB, Bootstrap, Django, Laravel. Pune, MH

SELF PROJECT

1. Super-Hero-Hunter (<https://surperhero-hunter.netlify.app/favourites>)

create a simple superhero hunter project using HTML, CSS, and JavaScript, we will build a webpage where users can add and remove superheroes. For this project, I will use my favorite superhero (for example, Spider-Man), and you can add your own favorite superheroes too.

2. PCIMCA Web-Site (<https://www.pcimca.in>)

Creating a dynamic website for **PCIMCA Senior College** using technologies like HTML, CSS, JavaScript, PHP, and Laravel involves several steps to ensure the site is functional, responsive, and scalable

3. Orianatech Web-Site (<https://www.orianatech.in>)
